capitalism s biggest problem is the executive in pinstripes who extols the virtues of competitive markets with every breath while attempting to extinguish them with every action saving capitalism from the capitalists is a groundbreaking book that will radically change our understanding of the capitalist system particularly the role of financial markets they are the catalyst for inspiring human ingenuity and spreading prosperity the perception of many especially in the wake of never ending corporate scandals is that financial markets are parasitic institutions that feed off the blood sweat and tears of the rest of us the reality is far different vibrant financial markets threaten the sclerotic corporate establishment and

increase corporate mobility and opportunity they are the reason why entrepreneurship flourishes and companies like the home depot and wal mart mere fly specks a quarter of a century ago have surged as they have they mean personal freedom and economic development for more people throughout history and in most of the world today the record is one of financial oppression elites restrict access to capital and severely limit not only general economic development but that of individuals as well open borders help check the political and economic elites and preserve competitive markets the greatest danger of the antiglobalization movement is that it will keep the rich rich and the poor poor globalization forces countries to do what is necessary to make their economies productive not what is best for incumbent elites open borders limit the ability of domestic politics to close down competition and to retard financial and economic growth markets are especially susceptible in economic downturns when the establishment can exploit public anger to restrict competition and access to capital while markets must be free to practice creative destruction rajan and zingales demonstrate the political and economic importance of a sustainable distribution of wealth and a baseline safety net capitalism needs a heart for its own good there are no iron laws of economics that condemn countries like bangladesh to perpetual poverty or the united states to perpetual prosperity the early years of the twentieth century saw vibrant open financial markets that were creating widespread prosperity then came the great reversal during the great depression it can and will happen again unless there is greater understanding of what markets do who benefits and who really wants to either limit them or shut them down saving capitalism from the capitalists breaks free of traditional ideological arguments of the right and left and points to a new way of understanding and spreading the extraordinary wealth generating capabilities of capitalism

the neoliberal transformation of welfare state institutions has intensified social inequalities raising questions of social justice across european varieties of capitalism in germany this

transformation occurred with third way social democracy and the consequent hartz reforms after ten years of reducing unemployment this hartz regime is now cited as a model for reforming other european political economies despite this apparent success it has also received criticism for exacerbating the social injustices of neoliberal capitalism ultimately leading to the question how do we know if the german hartz regime is socially just drawing on the frankfurt school of critical theory this study demonstrates not only how to develop a theory of social justice for empirically studying labour market institutions but also illustrates it through an extensive study of the german case the result is both unsurprising and reinforces classical social democratic concerns not only the hartz regime but capitalism itself is inherently unjust by accepting this previously recognised conclusion the book provides a critical framework for the normative evaluation of empirical institutions effective for studying the varieties of social in justice in contemporary capitalism beyond germany
